INDEX TO VOLUME 20, 1955

Journal of Speech and Hearing Disorders

A change has been made in the format of the index. Each article is indexed in two ways: it is listed alphabetically by the last name of the author, and it is also classified under a selected group of subject headings. An article may be located either by the author's name or by the subject matter of the article. Many articles are classified under more than one subject heading. The following subject headings are currently being employed in indexing the *Journal*:
